extended field of vision  
(recommended)

**Mercedes-Benz genuine exterior mirrors with an extended field of vision.**

EU research has shown that several hundreds fatal accident occur each year due to the mirror "blind spot", presenting a particular danger to cyclists, motorcyclists and pedestrians. The research has shown that wide angle mirrors (class IV) and kerb mirrors (class V) with an extended field of vision enhance safety and help to prevent accidents caused by blind spot on the co-driver's side.

European legislation stipulates that by 1st April 2009 all commercial vehicles above 3.5 tonnes—in accordance with EU Directive 2007/38/EC—must be equipped with wide-angle kerb mirrors with an extended field of vision on the co-driver's side of the vehicle.

This compulsory retrofit measure applies to all Mercedes - Benz Actros, Axor, Atego, Econic, and Vario with initial registration from 01.01.2000. All Mercedes - Benz commercial vehicles have been progressively fitted as standard with mirror systems that comply with the new legal requirements since the end of 2004 (beginning with the Atego and Axor model series).

In conjunction with Mercedes - Benz, Sparshatts of Kent Ltd will be happy to provide information on the extent to which your vehicle is affected by this compulsory retrofit measure.

## Extended vision for you, Enhanced safety for all

In the majority of cases, simply replacing the mirror glass is sufficient to comply with the legal requirements. Where

Necessary, we also offer suitable Mercedes - Benz retrofit and conversion kits for partial or complete mirror replacements.

For your own safety and for the protection of other road users, we strongly recommend that the current legal requirements are surpassed by additionally retrofitting your vehicle with a wide - angle mirror on the driver's side and a front mirror. We will be happy to equip your commercial vehicle quickly and efficiently - with premium - quality Mercedes - Benz Genuine Parts.

Don't delay, extend your vision and enhance the safety for yourself and all those around you, now.

## Mercedes - Benz genuine exterior mirror glasses

Mercedes - Benz genuine exterior mirror glass enable drivers to see precisely those vehicles, objects and above all

children, other pedestrians and cyclists who previously could not have be seen in the exterior mirrors at the side of the

Vehicle. They optimise your mirror vision and guarantees a host of further benefits:

**The " blind spot" is eliminated**

**Superb reproduction quality**

**Mirror glasses are perfectly aligned to your vehicle's requirements**

**We change your mirror or glasses quickly and efficiently**

**Mercedes - Benz genuine mirrors comply with compulsory EU Directive 2003/97/EC**
